ОТЧЕТ О ЛАБОРАТОРНОЙ РАБОТЕ № 3

ПО Teme: Создание таблиц базы данных POSTGRESQL. Заполнение таблиц рабочими данными

по дисциплине: Проектирование и реализация баз данных

Специальность: 09.03.03 Мобильные и сетевые технологии

Проверил:	Выполнил:
Говорова М.М	студент группы К3240
Дата: «» мая 2021г.	Поляков Андрей
Оценка	

Санкт-Петербург 2020/2021

Цель работы:

Овладеть практическими навыками создания таблиц базы данных PostgreSQL 1X, заполнения их рабочими данными, резервного копирования и восстановления БД.

Практическое задание:

- 1. Создать базу данных с использованием pgAdmin 4 (согласно индивидуальному заданию).
- 2. Создать схему в составе базы данных.
- 3. Создать таблицы базы данных.
- 4. Установить ограничения на данные: Primary Key, Unique, Check, Foreign Key.
- 5. Заполнить таблицы БД рабочими данными.
- 6. Создать резервную копию БД.

Указание:

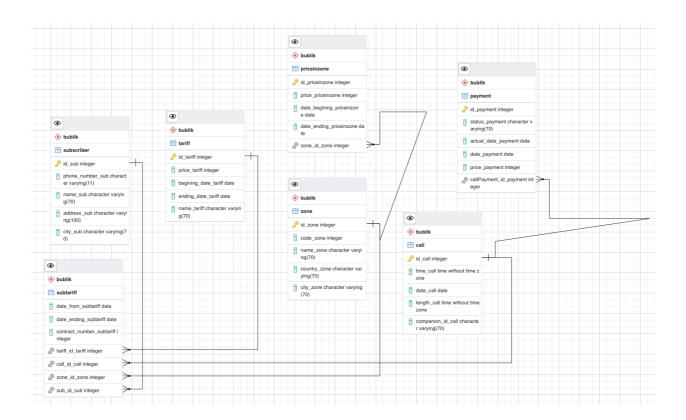

Создать две резервные копии:

- с расширением CUSTOM для восстановления БД;
- *с расширением PLAIN для листинга (в отчете);*
- при создании резервных копий БД настроить параметры Dump options для Type of objects и Queries.
- 7. Восстановить БД.

Индивидуальное задание:

Вариант 17. БД «Телефонная станция»

Название БД: "call_station"

```
Dump:
-- PostgreSQL database dump
-- Dumped from database version 13.2
-- Dumped by pg dump version 13.2

-- PostgreSQL database dump complete

Выводы:

- Создана БД **телефонная станция** с использованием pgAdmin 4 (согласно индивидуальному заданию).
- Созданы таблицы tariff, zone, payment, call, subscriber, priceinzone и subtariff.
- Установлены ограничения на данные: Primary Key, Unique, Check, Foreign Key.
- Создана резервная копия БД.
- БД восстановлена.
